2024/09/30 ~2024/10/08	Austria	Vienna University of Technology	Department of Planning, Architecture and Environmental Systems, Architecture and Architectural Engineering Undergraduate 3rd ~4th grade, Master 1st ~2nd grade	(SIT) Students 14, Professor 2 (Vienna University of Technology) Students 13, Professor 4	SUZUKI Shunji (Department of Architecture and Environment Systems)

Site Visit

In this international workshop, SIT students and Vienna University of Technology (TU Wien) students in the department of Urban and Spatial Planning collaborated in the field of Urban/Landscape Design, for 9 days, from September 30 to October 8. Number of participants was 14 from SIT, 13 from TU-Wien, including both bachelor and master degree students of urban planning, architecture and civil engineering.

6 teams were formed and each team worked on research and planning of 3 different sites in Vienna. Good collaboration, discussion and works were done. Each team presented two-sheet poster of A0 size and power point presentation in the final presentation, all showed high level of performance.

As an instructor I believe this program provided a very good opportunity for students of both schools to develop friendship, to learn how to collaborate with those have different background, and gained confidence by completing the task.
